

CROSSFIELD CHRONICLE

VOL. XXIII. NO. 31

CROSSFIELD, ALBERTA, AUGUST 28th, 1936

PRICE 1.50 A YEAR

"SCHOOL OPENS SEPTEMBER 2nd--

and we are going down to Laut's to get our supplies. They have scribblers with fancy covers and funny covers at all sorts of prices, and the nicest loose leaf ones you ever saw; and pencils of every kind from the ordinary five cent ones in all colors to the dandiest little propelling ones that were ever made; drawing pads and ink and crayons and rulers and paints and brushes and pencil boxes--I'll tell you boys, that's the place to get your stuff."

Wm. Laut

The Pioneer Merchant

Crossfield, Alta.

Are You Ready?

Better have us give your truck the once over before you commence hauling grain. A good mechanic and up-to-date equipment enables us to give you better satisfaction.

Service on all makes of cars,
trucks and tractors:

Wrecking and Towing Service,

Schools to Re-Open On September 2nd.

With only one serious case of Infantile Paralysis in the district, and that some 14 miles West of here, in all likelihood the ban will be lifted on August 30th, and schools will re-open for the fall term on Tuesday morning, September 2nd.

The Harrison children who were taken sick on August 16th, made a rapid recovery and were soon as well as ever. With no other cases reported there is nothing to get unduly alarmed as at yet in this district.

New Wheat Delivered

The first load of wheat in the Crossfield district was delivered on Friday by the Western Canada elevator by George Jones and graded No. 2 Northern, and we understand the yield was 17 1/2 bushels to the acre. Frank Laut also commenced hauling to the Pool elevator on Friday and has hauled in several loads that graded No. 2, and is yielding 25 bushels to the acre.

Several other farmers of the district were just reading to start combining when rain on Monday night and again on Tuesday have held them up.

The Western Canada elevator shipped out the first carload of 1930 wheat on Monday. Geo. Jones had the honor of bringing in the first load of wheat, and also the first carload.

The Pool elevator shipped out a carload of wheat on Wednesday. This grain was sold to the pool by Frank Laut.

Initial Pool Payment 60c per Bushel

Initial payment by the Canadian Wheat Pools, on wheat of the 1930 and 1931 crop, delivered Tuesday, August 26th, and thereafter, until further notice, will be 60 cents per bushel. The advance, announced Monday night, is made on the basis of No. 1 Northern, at Fort William.

Adam and The Fish

Adam Cruickshank arrived home on Friday after a three days fishing trip to Pine Lake. Adam landed home with 145 perch, but they did not last long, as he gave some away and told some of his friends to help themselves, --which they certainly did, and when Adam went out to get a few for himself he found the cupboard was bare. They had cleaned him completely.

I can't print here just the words used by Mr. Cruickshank in describing this incident, but realizing it was no place for a preachers son I got out before he got through,

F. Collicutt Wins Good Farms Competition

Mr. Collicutt has been awarded first prize in the Calgary Board of Trade good farms competition for Southern Alberta. There were some fifty entries in this competition and the district extended from Red Deer to the international boundary.

Mr. H. Wright of the Crossfield district won second prize for a field of oats in the Southern Alberta competition.

Competition this year was exceptionally keen with 624 competitors in northern and southern Alberta.

Prizes were given for the best fields of wheat, oats, barley, and the good farms competition.

Members of the staff of the field crops branch of the Department of Agriculture acted as judges.

Police Court News

Annie Douglas was arrested by Constable Jarman on August 23, as a vagrant, and appeared before Magistrate Lewis the same day.

Filed \$2.00 and costs and ordered to leave town forthwith. Annie is supposed to be a foot racer and it is too bad that she did not get to Hamilton last week for the races as she is fast.

Joseph Brown wanted at Red Deer on a charge non-support, was arrested by Constable Jarman at Airdrie on August 24 and taken to Red Deer for trial.

Several Auto Accidents

During the past two weeks there has been five or six accidents on the highway near Crossfield, and cars have been badly damaged. In all cases there was no one to blame as in all except one instance, they were all accidents of the nature where there was no collision or interference from other cars.

Tennis Tournament On August 31st.

The Crossfield Tennis Club are holding a handicap tournament on the local courts on August 31. Each couple will be handicapped and play against each couple, the winners of the greatest number of games will receive the prize.

The Club is expecting entries from the surrounding district and the tournament is open to anyone who desires to enter, whether they belong to Club or not.

Mr. Laut has kindly put his court at the disposal of the Club for the day in case there are more entries than can be accommodated on the local courts.

Local and General

Sister Mary Bernadine McNally B. A., daughter of Mr. and Mrs. P. I. McNally, who has been holidaying in Edmonton was a passenger on Monday's train on her way to Lethbridge to resume her duties as principal of the separate school.

The Crossfield Garage have recently added to their up-to-date equipment, a large crane which is mounted on a truck and used for wrecking service. If you happen to have a smash-up with your car or slide in the ditch, just phone No. 4 and they will put your car back on the grade or tow it into town for you in less time than it takes to tell.

The regular monthly meeting of the Women's Guild will meet at the home of Mrs. Layton on Thursday, September 4th. Will all members please attend at 3:30.

Bill Emerson of the U. F. A. Staff left on Monday for Calgary and points south, where he will spend his holidays, to say nothing of spending his bank roll,

"SALADA" TEA

'Fresh from the gardens'

Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Gabson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have had the benefit of the first two periods in the second period.

It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shelving it after a couple of trials. Of what good are blue prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own some day—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance should also be included in your budget.

The second watchword, "saving," has been brought to the consciousness of people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually reinforce.

With it comes the "investing" word, and the choice between invoking the almost unbelievable power of compound interest when harnessed to regular monthly savings, on one hand; on the other, putting the money into well secured securities. In the first case you need no particular advice, for in its operation compound interest is both tireless and automatic. In the second instance, that is, with investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a short-term margin. Remember this, too. It is wise to keep a part of your funds in liquid form—that is, in cash or such short-term securities as can quickly be converted into cash. You will need these for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each square dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "sparing" power; that is your ability to save. You will be able to see with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income now.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, vehicles, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your earnings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

However, this advice about investing is almost valueless if it is to be only a temporary effort, or if you allow your investments to be frittered away through carelessness or the greed for more. Rather turn to the fundamental needs of assured income.

And, above all, turn to work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "goodness with contentment is great gain" in your finances as well as in the rest of your life.

Wheat Pool Membership

The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 2,000 within the year, according to Gillis Perrell, of the Canadian Press.

Huge Power Projects

Millions To Be Spent In Next Three Years On Hydro Development

More than \$100,000,000 will be spent in each of the next three years on power projects now under development in Canada. Although there are other plans for important building projects, the present trend indicates a marked bearing upon the industrial development of Canada than those now contemplated by the power industry.

The present turbine installation in the Dominion averages 583 horse-power per thousand of population, a figure which places Canada among the leading countries of the world in per capita utilization of water-power. The total installation now amounts to over 5,700,000 horse-power and an additional installation of over 3,000,000 will probably be made within the next five years. Quebec has the largest installation with an average of nearly one horse-power per person. Ontario has a total installation of nearly two million horse-power, and in 1929, the power companies in that province generated over six billion kilowatt hours, or more than one-third of the total produced in the Dominion. Manitoba has an installation of over 300,000 horse-power, while Alberta, 70,000. In the Prairie provinces, large resources are available and turbines with a capacity of 500,000 horse-power have been installed in British Columbia.

Is Baby Teething?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore; diarrhea, constipation, colds, convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets, concerning which Mrs. Louis Grubb, Teeswater, Ont., says: "I have used the Tablets with my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are all made of dealers or by mail, 10 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Russian Laws On Religion

Teaching Of Religion In Schools Is a Punishable Offense

Extracts from the Russian laws on religion, compiled by the British embassy at Moscow, are as follows: An omnibus law, "On Religious Affairs," says:

"The publication was in fulfillment of a promise given to the Conservatives by the Labor Government last April, when groups in Great Britain and other nations were protesting against alleged religious persecution in Russia.

The "white paper" cites a provision of the Soviet constitution providing for the separation of church and state, and of schools from church, which equates guaranteeing liberty of religious belief and freedom of anti-religious propaganda.

It also quotes a provision of the criminal code by which the teaching of religious beliefs in schools to young children and persons under age is punishable by a year of compulsory labor.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

B.C. Hydro Development

Possibility of developing 3,000,000 horse-power from rivers along the coast district of British Columbia is disclosed by engineers.

First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of private organizations, which would be given special encouragement for buying or leasing large tracts of vacant land which would be developed with the aid of the British and Dominion governments, is Labor's newest scheme for a solution of the unemployment problem which is costing Great Britain \$700 per minute.

Horace Greeley's "go west, young man" would become "go east or west" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference in London. England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the more than 2,000,000 persons unable to find work in Britain.

Immigration question. Members of

The plan is a new approach on the government that the old systems of homesteads and other piecemeal movements of people were wholly ineffective under modern conditions. The British and Dominion were also opposed to any emigration they would only swell the ranks of undirected influx of British where their unemployed.

The scheme is therefore a pretentious plan to find a place for those at present unoccupied and not wanted. The utilities would be given cooperation in acquiring land and the development of virgin territories would be left in their hands. The British and Dominion governments would aid in carrying out a comprehensive plan to settle the territory and emigrants would be furnished as man power for the markets needed to establish a new economic frontier.

The government is pushing the project for a new type of pioneer and the unemployment problem of the even claim the idea is a solution of Dominion as well, since the opened territory will be open to the workless there as well as England. It also claims that emigrants are willing to leave immediately, and the uncertainty of unemployment holds them in England for their dole.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of Britain or among the proponents trouble in finding investors in the event the plan is adopted.

To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and repair work, from coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The varied programme includes the laying of branch lines, repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

Increase Wheat Duty

An increase in duty on wheat imported into Italy put into effect recently in order to safeguard the farmers of the country from importable prices has been reported by A. B. Muddiman, Canadian trade commissioner, in Milan, to the Department of Trade and Commerce. There is an official estimate of loss of about 1,000,000 tons of wheat in this year's harvest.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

"I have lost my biggest creditor."
"He is dead!"
"No, there was no help but to pay him." — Buen Humor, Madrid.

W. N. U. 1882

Saskatchewan Egg Pool

Higher Prices Obtained This Season Over That of Last Year

An increase in price over those paid last year has been noted in the final payment of the Saskatchewan Co-operative Poultry Producers Limited, or Egg Pool. It is claimed that these prices (extra 22 cents; drufs 10 cents; seconds 17 cents; crax 15 cents, net cash, f.o.b. shipping point on freight shipments), are not only higher than at the same time last year, but are from two to three cents per dozen higher than those paid by any other commercial concern in the province. The volume of business handled by the Pool has again increased by 18 per cent. following last year's gain of 58 per cent. over that of 1928.

Ayrshire Breeders' Association

Ninety-Five Reports Of Cows Qualified For R.O.P. Standing During June and July

During the months of June and July, the Honor Roll of the Canadian Ayrshire Breeders' Association received 95 entries of cows qualified that had qualified in the R.O.P. — 35 in the 265 day class, and 62 in the Honor Roll or 305 day division. In the former, 15 qualified in the mature class; 4 in the four-year-old; 5 in the three-year-old, and 9 in the two-year-old class. Twenty-seven of these records were made on two millings a day.

One of the outstanding features of the sea flea meet at Swastika Beach, Puslinch Lake recently, was the driving of Ald. William Marriott, of Hespeler, Ont., who won the only national local race in three straight heats from younger men, but stopped on up into the competition of Class "C" and finished fifth in a good field of high-class and experienced drivers. Up and around Puslinch Lake Ald. Marriott is affectionately known as "Old Bill." He drives a real racing sea flea outfit, and is not only a superb rough water driver, but he skims the buoys by a whisker and is not afraid to plow right into the turnoff of a big field. His work at the starts drew cheers every time he came up for the flag.

Canada Holding Trade Position

Dominion Maintains Place Among Leading Trading Countries Of the World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$103,356,512 compared with a favorable balance the year before of \$103,216,984. This was attributed to the falling off in the export of grains, particularly wheat, to the United Kingdom and continental Europe, due partly to lower yields.

Canada's total trade in the last fiscal year was \$2,398,212,000 compared with the total of \$2,654,975,000 in 1929, and \$2,359,655,000 in 1928. It is thus seen that while trade last year showed a falling off in comparison with the year before, it was still in excess of the total in the year ending March 31, 1928.

Imports last year amounted to \$1,245,733,582, compared with \$1,263,679,091 the previous year. The sharp decline in imports is evident by the total figure of \$1,144,938,070, compared with the 1929 figure of \$1,388,896,075. The decrease in exports was \$243,968,006, and the increase in imports was \$17,405,533, 17.6 per cent for exports, and 1.4 per cent for imports.

In export trade Canada leads the world in the export of printing paper, nickel, and asbestos; occupies second place in exports of automobiles, wheat and wheat flour, and fourth place in exports of wood pulp as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw tires, whisky, metals, rubber tires, farm implements and raw gold.

Interpreter Knows His Job

One of the busiest men in London this summer is W. Brownthwaite, interpreter for a bus company, who directs people in their own language. Besides English, his own tongue, he speaks German, French, Italian, Danish, Swedish and Japanese. "I can even talk American," he said, "which is just as well, for any number of Americans seem to think they need an interpreter in London."

Put On Publicity Program

In a further effort to bring before the people of the province the great variety of the products of farm and factory, the Manitoba-Minnesota Committee of the Industrial Development Bureau is staging an extensive publicity programme.

Summerfield cafes have been introduced in Havana.

PRINCE OPENS NEW WORKSHOP

Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

Free Correspondence Courses

Educational Opportunity For Every Boy and Girl in Saskatchewan

Educational opportunity for every boy and girl in Saskatchewan is the aim of the educational department of which the provincial Department of Education is steadily working. Notwithstanding the rapidly growing system of secondary education in high school, collegiate institutes and in elementary schools, these schools do not provide the facilities to supplement the work that being done. Provisions have been made by means of correspondence classes, to give a course of instruction to several hundred boys and girls who, for various reasons, have been unable to attend the public or elementary schools. The next step is the inauguration of correspondence instruction in high school courses. These courses are for the benefit of pupils who have no high school facilities, or who have such physical disability as would prevent their walking to school.

Farm Boys and Girls

Canadian Juvenile Club Work Is Outstanding Among the Nations Of World

"Canada stands second only to the United States in all the world, in the work she is doing for her farm boys and girls. Our juvenile club work is outstanding among the nations," declared F. W. Walsh, superintendent of agriculture for the Canadian National Railways, who has just returned from England, where he attended the royal agricultural show at Manchester, as coach in charge of the Canadian boys' cattle judging team which participated in the international cattle competition in July.

During his trip Mr. Walsh also attended the world's poultry congress as one of the Canadian delegates, and made a special trip to the continent to study phases of agricultural development there.

Summerfield Tests

Found To Be No Advantage In Flowing Deeper Than Four Inches

How deep should summerfield be plowed? The answer to this important question in respect to prairie farming is provided by the Dominion Experimental Station, at Scott, Sask., where, after fourteen years of careful investigation, it has been found that there is no advantage in plowing summerfield deeper than four inches, where a good job can be done at this depth. Not only is this sufficient for the proper retention of moisture, but a considerable saving in time and labor is possible, and it assists the work of cultivation for weed control. Plowing at depths ranging from three to eight inches was studied throughout the period of the test.

Poultry For Profit

Importance of Carefully Culling Flocks Before the Laying Season

The ten-year average of the cost of feeding laying hens at the Lennoxville Experimental Station, of the Dominion Department of Agriculture, is \$2.42 per dozen eggs. At this rate, with eggs selling at an average of 35 cents per dozen, it takes 6.75 dozen, or 81 eggs, to pay for the laying hen—only the eggs laid in excess of that number can count as a profit. This demonstrates the importance of carefully culling poultry flocks before the laying season begins. It is the hens that lay from 150 to 200 eggs a year that pay.

Good Road Making Material

Meet With Success In Extraction Of Tar From Sands In Northern Alberta

Success in the extraction of tar from bituminous sands in the McMurray area of Northern Alberta is said to have cleared the way for an effort on the part of D. H. A. Clark, of the University of Alberta. It is reported that 95 per cent. pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material.

First Picnicker — "Isn't this an ideal spot for a picnic dinner?"

Second Ditto — "It must be. Fifty million people can't be wrong."

All airports in the United Kingdom now are government controlled.

Suppose by some accident, all the coal mines of Alberta should suddenly be set on fire and, before the fire were extinguished, a full year's output of Alberta coal should be destroyed. And suppose, while the fire were going on, that the government took no steps to prevent this gigantic loss. What an outcry would echo from ocean to ocean in Canada against such a national scandal. Yet, in another form, that is exactly what is taking place day by day.

Natural gas is the chief fuel for heating that coal, is being burned in the air in Turner Valley annually at a rate nearly equal to the entire Alberta production of coal in 1927.

In 1927, Alberta produced a total of 6,034,194 tons of coal. In 1928, Alberta burned, in the air, in Turner Valley, between August 1 and December 31, 6,735,489 tons of coal.

Increased production of coal in Alberta has been made conservatively, by natural gas which will be burned as waste there in the coming year, will exceed the banner year of coal production. This is based on careful calculations. They are careful estimates, made conservatively, by oil and heating engineers. Enough natural gas went to waste in Turner Valley, between August 1, 1929, and August 1, 1930, to supply the needs of present Alberta users for 15 years. Assuming that Saskatchewan were to use eight billion cubic feet per year, as compared with Alberta's six and a half billion, enough gas went to waste in that time to supply Saskatchewan for 12 years.

Compared with coal, enough gas goes to waste in Turner Valley every day to equal nine million tons of high-grade coal; each train being of 50 cars, and each car containing 40 tons. Thus, fuel equal to 18,000 tons of coal goes to waste. Multiply that by 365 for the total wasted each year and the figure looks like eight years in connection with a star on the outer rim of the universe, 6,750,000 tons a year to be exact. The daily waste, on an average, from August, 1929, until August, 1930, amounted to 300,000 cubic feet per day. Against this an average of only 20,000,000 cubic feet per day was used.

If these train loads of heat had to be shipped out of Alberta just as her wheat is shipped, the railways would have to supply facilities for two-thirds more trains than in the biggest rush season of the year.

Ornicularly about 600 cars of grain are loaded at Calgary daily following the harvest, and in the same basis, these cars would constitute 12 trains. Therefore it would work out to nine heat trains and 12 wheat trains per day.

But that is only part of it. The wastage between August 1, 1928, and August 1, 1929, on the same basis, would have worked out to six train loads of heat per day, so, in a like ratio, the wastage for that year was just two-thirds of the waste figure figured out for the season 1929-30.

These figures have all been for the past. The future can hardly be guessed. At present 50 wells are producing, and it is possible that 250 similar wells could be brought in without difficulty. Then the figures would be just multiplied by five. And Turner Valley is only one valley. There are others with possibilities according to geologists and experts in the oil game.

Canada Grows Fine Tobacco

Canadian Grown Tobacco Of Better Quality Than the Imported Leaf

Canadian farmers, consequent upon research work done by the Dominion Department of Agriculture, are now producing practically all the fine tobacco required by Canadian manufacturers, observes Dr. E. S. Archibald, Director of Dominion Experimental Farms, who adds that the quality is better than that of the imported leaf.

"Do you know what to look out for when fishing, sonny?"

"Of course I do — the policeman." — Hummel, Hamburg.

ARMY OF MEN OUT OF WORK EAST AND WEST

Ottawa, Ont.—In 84 centres which have replied to the query of Hon. G. D. Robertson, Minister of Labor, on unemployment figures there are 112,904 people out of work in Canada, and it is estimated that number will increase to 150,000 during the winter. Mr. Robertson gave these figures to the Employment Service Council, of Canada, at the opening of the annual meeting.

The figures, he pointed out, did not include 14 or 15 centres which had not reported, or the number who were out of work in numerous small centres throughout the country, and in rural areas.

Senator Robertson said he considered the figures received a conservative estimate. It was not unreasonable to say, he added, that there were now 200,000 people out of work in Canada. Figures compiled on August 15, he stated, showed that out of 206,597 union men in Canada, 26,796, or 13.9 per cent., were out of work.

The Government of Canada does not propose to adopt a general policy in dealing with unemployment but it does propose to help the people to help themselves.

"I do not for one moment suggest," he said, "that the present unemployment is due to any government or lack of governmental activity. Unemployment is not a purely Canadian problem. It is world wide. But it is not the business of the government of Canada to look after the world as a whole. It seems to me the problem first to be faced by the government to look after the people of Canada and assist them to look after themselves."

The proposal has just been made to me that the federal grant to technical schools should be increased. It would be a great boon to the unemployed. I do not know what the government will do because the master has not been considered. But I do know it would at least enable the unemployed man to improve his skill during the time he is out of work."

"I feel, however, that if the technical education plan as inaugurated some years ago had been carried out to the full there would not be so much unemployment today."

To the cause of unemployment the minister referred development of labor-saving machinery, particularly in the west. This, then, was the question of immigration. Felt that it was its duty to see that the people of Canada had employment before inviting others to come in the government had taken steps to restrict immigration.

A special session of parliament was being called to deal with the situation. The government proposed to pass legislation enabling it to invite the co-operation of the provincial and municipal authorities and the co-operation of employers of labor with a view to providing all the employment possible as quickly as it could be done.

Daughter Born To Duchess

Birth Of Daughter To Duchess Of York At Glamis Castle

Glamis, Scotland.—The birth of a daughter to the Duchess of York was announced at Glamis Castle, the home of her parents.

The royal mother and the little princess are making highly satisfactory progress, according to an official bulletin from the gray-green castle.

News of the birth was immediately flashed by telegram to King George and Queen Mary, who are staying at their Norfolk estate of Sandringham.

The baby is the fourth grandchild of the King and Queen. The others are Princess Elizabeth and the two sons of Princess Mary, Countess of Harewood.

John R. Clynes, home secretary of the Labor Government, officially attested the royal birth. He and H. P. Fisher, parliamentary secretary to the mines office, were both at the castle to attest the birth.

Nurse Bevors, who attended the Duchess and Princess Elizabeth, was with Her Highness. Dr. David Miles, who with Sir Henry Simon, noted London obstetrician, assisted at the birth, has attended the duchess since her childhood.

New Gold Discovery

Hudson, Ont.—A new gold discovery is reported from the district 40 miles west of Red Lake, and near the Manitoba boundary, and a mining expert has left for the locality to investigate.

W. N. U. 1852

Savage Abandoned Planes

Two Planes Of McAlpine Party Are Recovered After Enduring Storms Of Last Winter

Edmonton, Alberta—Boating the Arctic again, Canadian fliers and airships have triumphed in a far northern test.

The test constituted a drama in three acts. The first when the McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second act was while the machines were awaiting rescue in Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvaging of the machines.

One of the monoplanes was the property of Dominion Explorers, Limited.

A little over a week ago supplies of gasoline and oil were taken to the scene of the forced landing. The machine was "gassed up" and flown to Coppermine River, where, without overhaul it was placed in service.

On Thursday evening last, August 15, the second machine, the property of Western Canada Airways, was reached by Pilot Buchanan and his mechanic, and on Monday evening, August 18, the machine landed at McMurray.

So far as can be seen the machines suffered no damage through their long stay in the Arctic. Their motors started without difficulty once fuel and oil were provided and there was no visible evidence of deterioration.

The Western Canada Airways machine will undergo a thorough examination at McMurray to determine if a complete overhaul is necessary.

Canadian Beef For Britain

British Market Offers Great Opportunity For Canada

Montreal—Canadian beef will re-enter the British market for the first time since 1928 with the announcement of the Canadian government that 125,000 head of grade Hereford and Shorthorn steers, bred in Ontario and now consigned to a firm of importers in Manchester.

The majority of the steers were raised on the farms of P. J. Henry, of Ricetown, Ont., and M. J. Campbell, of Dutton, Ont.

Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, offers remarkable opportunities to Canadian breeders, according to Donald Munro, president of D. Munro and Sons. One hundred and sixty thousand pounds of dressed beef were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

Much of the traffic could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef in the British market is New Zealand, which is a remarkable success story.

Rt. Hon. Arthur T. Henderson, foreign secretary, is said already to have opened consultations with the dominions for simultaneous signature of the general act in September, in the same way they signed the optional clause last year.

Thirty states, or more than half

Proposed Health Insurance

Compulsory Form Of State Health Insurance Proposed For B.C.

Victoria, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the B.C. legislature at its next session, according to reports current at the parliament buildings.

Although the royal commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that its findings will conclude in a final report which will be ready before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

To Celebrate Victory

Six Premiers To Attend Conservative Dinner In Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada; and Provincial Premiers T. S. Tolmie, British Columbia; J. T. Anderson, Saskatchewan; G. S. Harrington, Nova Scotia; J. B. M. Howard, Newfoundland; and G.

Howard Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

SETTLEMENT OF DISPUTES UNDER A WORLD COURT

New York. — Dispatches from Geneva to the New York Times report that the British Labor government is envisaging an assembly at the League of Nations annual session in September, in its acceptance of the general act for compulsory peaceful settlement of all disputes under the world court.

The majority of the steers were raised on the farms of P. J. Henry, of Ricetown, Ont., and M. J. Campbell, of Dutton, Ont.

Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, offers remarkable opportunities to Canadian breeders, according to Donald Munro, president of D. Munro and Sons. One hundred and sixty thousand pounds of dressed beef were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

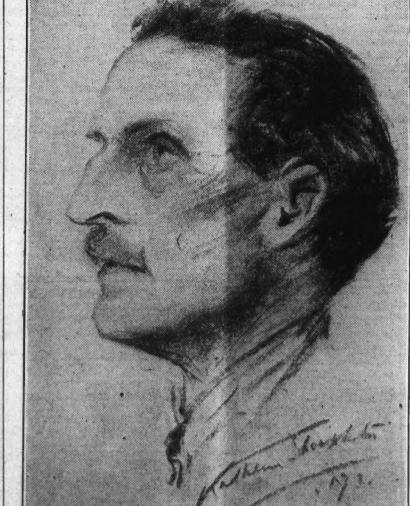

Much of the traffic could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef in the British market is New Zealand, which is a remarkable success story.

Rt. Hon. Arthur T. Henderson, foreign secretary, is said already to have opened consultations with the dominions for simultaneous signature of the general act in September, in the same way they signed the optional clause last year.

Thirty states, or more than half

the league's membership, have now signed the optional clause, but only three have bound themselves by the general act. These are Belgium, Denmark and Norway. The French Chamber of Deputies approved it in June, but the senate has not yet acted.

THE KING'S DOCTOR

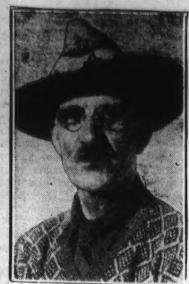

Lord Dawson, of Penn, physician to His Majesty King George V, as sketched by Miss Kathleen Shackleton, on board the Canadian Pacific liner "Empress of Australia." Lord Dawson is reputed to have the finest doctor's hands in England, and has the fine features and eyes sometimes recognizable in great artists.

He is looking forward to his first sight of the Rockies and later is going to disappear and take a real holiday out West. A ranch is his ultimate destination.

Plan Relief Work

Toronto, Ont.—Announcement has been made by Hon. William Finlayson, Ontario Minister of Lands and Forests, the government is completing a scheme of relief work in Northern Ontario to take care of many of the unemployed lumbermen and mill workers who are faced with destitution during the coming winter.

PROMINENT MARKSMAN

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 900-yard range, winning the lieutenant-governor's match with 118 points.

Airplane Fatality

Pilot Is Killed Through Falling Into Propeller Guards

Owen Sound, Ont.—Crashing up top of the hill to adjust the propeller of George P. Parsons, 32, Toronto, was instantly killed when he fell into the whirling blades of the propeller. Prominent airmen believe it is the first fatality of its kind in the history of Dominion aviation.

Parsons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibian biplane to Wasaga Beach recently. The machine was the only one of its kind in the Dominion, it is claimed. The engine and propeller are situated overhead.

After considerable tinkering, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Montreal Bank Robbed

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the four employees of the Banque Provincial, at 4137 St. Catherine Street, East, and a customer, and escaped with \$2,970 of the bank's funds by commandeering a passing taxicab. In their hurry, however, the bandits overlooked \$9,000 which was on a shelf in the teller's booth.

Elevator Destroyed By Fire

Winnipeg, Man.—Damage estimated at \$75,000 resulted when fire razed the Assiniboine Grain Company elevator in St. Boniface, across the Red River from Winnipeg. The structure was valued at about \$60,000 and it contained 50,000 bushels of barley, property of Wiley, Low and Company, grain merchants. Insurance covers the damage, it is stated.

Yacht Wrecked

Of English Coast

Commodore King and Five Others Lose Lives When Vessel Goes Ashore

Fowey, Cornwall, Eng.—The 22-ton yacht "Islander," wrecked upon the jagged rocks of Lantivet Bay in a violent storm which pounded the English south coast, carried Commodore Henry Douglas King, a prominent member of parliament, and five others to their deaths.

Those who were on board the "Islander," which was owned by Lieutenant-Colonel John N. Diggle, had chartered the "Islander" for a vacation cruise, were Commander Searie, of Berwick-on-Tweed; Surgeon Captain A. R. Bradley, Dunmow, Essex; Captain Glazebrook, of Bishop, Stortford; Harry Lucas, captain of the yacht, and his 17-year-old brother, Walter.

The yacht, which was owned by Lieutenant-Colonel John N. Diggle, had been participating in regattas of Canadian yachts to New Zealand during the fiscal year ended March 31 last, reached a total of 10,349 with a valuation of \$5,006,791. During the same period, parts to the value of \$441,558 went from Canada to New Zealand. The value of automobiles exported by Canada to New Zealand during the preceding fiscal year was \$4,787,504 and parts \$368,473.

With a view to ascertaining just what general tariff it is proposed to apply to Canada, the Department of Trade and Commerce is communicating with New Zealand. The New Zealand Government has recently changed its tariff, the general rate on foreign cars being increased from 50 per cent. to 56½ per cent. and from \$1,000 in value, to 42½ per cent. to 48½ per cent. over \$1,000. There is some uncertainty as to whether the old or new general rate is applicable to Canadian exports.

Under the former rate, which applied to Canadian motor cars and the tariff, known as "body-duty" was 20 per cent. on the value of \$1,000 and 15 per cent. on the value over that amount. On July 22, however, this rate was increased to 21½ per cent. on up to \$1,000, and 16½ per cent. on the remainder of the value, if any.

The whole question of Canada's trade relations with New Zealand will, it is expected, be canvassed by the government with a view to the negotiation later on of a new direct trade agreement to replace the one which will lapse in October.

Grow Grain At Churchill

Wheat, Oats and Barley Can Be Successfully Grown At Northern Port

The Fox, Man.—Wheat, oats and barley will be successfully grown at Churchill within four or five years. That was the prediction made here recently by D. A. Brown, of the Federal Government Experimental Farm at Brandon, Man., who has just returned from a trip on the Hudson Bay Railway.

Mr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing. With proper cultivation and good soil, grain can be raised well at the location, he believes.

The official inspected the first plot of grains to be grown at the Hudson Bay port. They did not fare very well, partly due to late sowing and lack of good soil, but Mr. Brown states that the experiment was well worth while. Reward and Garnet wheat attained a height of 18 inches, but it isn't expected to ripen because it was sown late. Alaska oats have made a fair showing, while Trebi barley has a good chance of ripening.

However, garden produce, such as radishes and lettuce, were raised successfully at Churchill this season. Potatoes did not fare well.

W. Wood, of the railway construction department of the C.N.R., was responsible for the grain-growing experiment at the Hudson Bay port.

Grains have matured well at several points along the Bay railway this year, Mr. Brown reports.

Disease Is Spreading

Infantile Paralysis Causing Considerable Alarm In Ontario Centres

Toronto, Ont.—Infantile paralysis, the dread disease now spreading through Ontario, is to be one of the chief topics of discussion at the British Medical Association convention to be held in Winnipeg, Dr. Scott Stevenson, representing the British Medical Journal, stated here.

That the disease is slowly spreading is shown in latest reports from various medical officers of health from different parts of the province. A new case has developed in Brantford, making a total of 18 there. A young boy, Joe Wightman, Bowmanville, succumbed from the effects of the disease, and there are still four cases in that town.

In this city 32 were reported up to today, and although all appeared of the mild type, warnings have been issued to citizens to watch closely for symptoms in their children.

Causes Of Earthquake

Little Known Forces May Be Factors In Earth Disturbances

The "trigger" force that sets off earthquakes, like Italy's disaster, is identified vaguely in scientific theories that place it all the way from gravitation coming from outer space, to the earth's own depths. This trigger, the most remote that kicks the quake, is often thought to be the possible means of forecasting quakes.

Gravitational forces are agreed on as a basis of earthquake power. But the condition that upsets the balance of rocks, of mountains or whole sections of earth's crust so that they stand like a house of cards ready to be tumbled down by a comparatively slight push, has not been agreed upon.

Identifying the trigger is one best kept secret, protection further back into the mystery. One suspected trigger, the microseisms which have come to light recently, with the advent of super-sensitive seismographs. Microseisms are tremors that barely move the recording needles. Their cause is not known, but changing weight of the air that accompanies weather changes, is suspected.

Another unproven trigger, is the weight of the ocean tides, sweeping over the continental shelves, which are the foundations of the surrounding continents, as far as 100 miles off shore. Another which might be either trigger or the builder of the house of cards, is the possibility of the tides in "solid" earth. Harlan P. Stetson, director of Perkins Observatory, at Delaware, Ohio, this spring, advanced arguments that these earth tides actually exist.

Chase S. Osborn, now candidate for the United States Senate in Michigan, holds that the well-known trembles of the earth's poles, and consequent tilting and readjusting of the earth's shape, accounts for the unbalancing. The theory of isostasy, is widely held. This means that the earth's crust, instead of a uniform solid cover, is made up of sections of all sorts and sizes and weights that must balance against each other, with almost fluid movements. Asthenoliths are another hypothesis. They are sections where mated rocks 30 to 60 miles below, the surface, just upward heat and gases that cause both volcanoes and earthquakes.

The melting of rocks is held to come from extra pressure of an unbalanced earth crust above them. An asthenolith might grow anywhere.

A Canadian Playground

Sylvan Region Of Great Beauty Is Found In Northern Saskatchewan

North of the great fertile belt devoted to agriculture there lies in the province of Saskatchewan, Canada, a region of rocks, woods, and water which seems almost to have been formed by nature as a special playground for man. Here are found thousands of cypress lakes, white birch, jack pine and white spruce grow here to unusual size and beauty. Pickeral, pike, and gray trout are plentiful in the lakes and streams, while moose, deer, bear and many species of game birds abound. A typical example of this region is Prince Albert National Park. It was set aside in 1928 and is an important addition to Canada's already fine system of national reservations.

Business Men's Tour To Orient

More than thirty reservations from all parts of the world have been made with the Canadian Council of Commerce for the business men's tour to the Orient this fall, leaving Vancouver on October 15th. H. R. McMillian, of Vancouver, chairman of the excursion, states that he expects an additional fifty reservations will be made before sailing day.

The high cost of living wouldn't be such a problem if the luxuries of yesterday had not become the necessities of today.

"You are a quarter of an hour late, Meier."

"I fell down the stairs . . ."

"But that does not last a quarter of an hour." — Hummel, Hamburg.

Mostly Kleptomaniacs

Found That Shoplifters Rarely Steal Because They Are In Need

Shoplifters do not steal because they are poor but because they cannot help it.

This statement was made by the head of the indoor detective squad of one of Toronto's largest department stores. The question was raised and answered as a sidelight in connection with the unusual number of shoplifting cases that have figured in the press during the past few weeks.

In the vast majority of cases that come up, The Mail and Empire's investigation finds, it is found that the people who steal are in no way in need of the things they steal. They do it usually because of some idiosyncrasy of make-up.

In fact, so unusual is it to find people stealing because of necessity that recently, when a woman was caught who had been stealing from the store in order to feed her family, the management, after she had confessed, cleared the matter up with the police and sent her a shipment of groceries.

For some reason never yet explained, women are far more prone to shoplifting than men. They figure, in fact, in almost 80 per cent of all cases that come to the attention of the store authorities.

Shoplifting is not confined to any one class of society. It is almost as common amongst the wealthy, as the poor, amongst the upper levels of society as the lower.

"We've had some amazing cases to prove this," the detective head declared. "We have one professor's wife in town," he said, "and she steals repeatedly and is repeatedly caught. You'd be amazed if you knew who it was. We always go to her husband, and he makes things right. The woman always treats the matter lightly and doesn't seem to be worried in the least when she gets caught."

The attitude of the store towards those caught stealing is surprisingly mild. "We prosecute very few cases," the detective declared, "usually only those who do their guilt in most cases, just let them go. Where the offenders look as if they were really bad characters, however, we lay charges against them."

Counterfeiter Bank Notes

Spurious Bank Of Nova Scotia Ten Dollar Bills Being Circulated

Counterfeiter Bank of Nova Scotia ten-dollar bills are being circulated in Canada, according to a warning issued by the post office department. The spurious money is described as follows:

"The counterfeit is a photographic copy made from the genuine note issued on January 2nd, 1928, series "A". In appearance, it is darker and is slightly blurred. The back is of the 1924 issue but of a deeper blue and is quite blurred. The numbers, which are crudely executed, are about the same height but wider, and the figures, 20082, on one counterfeited already presented take up slightly more space than on the genuine bill. In size, one of the fictitious notes presented about 1-16 inch smaller than the genuine, while another is the correct size. The paper is rather greasy and has a shiny finish."

Politics Are Precarious

Ten Years More Than The Average Length Of Tenure For Parliamentarians

Politics, apparently, is the most precarious and short-lived of all professions. Every two decades Parliament renews itself, and thus, incredible as it may seem, there will not be a half-dozen men in the new Parliament who sat in the House with Laurier. Since 1911 more than 400 men have entered Parliament, strutting the stage for a brief time, and then passed to oblivion. Ten years, or two sessions of the House, is more than the average length of life for the ordinary parliamentarian. — Ottawa Journal.

Tourists Travel By Air

As the first of the flying touring parties planned in Europe this year, 20 planes with amateur pilots, recently started from England. Their first stop was at Frankfurt, Germany, where they spent a day in sightseeing, and in attending a contest at the local sports club. They next visited Friederichshafen, and afterward stopped at many other European cities.

Western Canada Coal

With the exception of true anthracite, practically every kind of coal is to be found in Alberta and British Columbia. The high grade lignites and sub-bituminous coals of Alberta are owned by the provincial authorities as domestic coal to differentiate them from the ordinary lignites.

Conserving Wild Life

American Game Protective Association Will Tag Deer To Study Habits

Science is advancing in various ways on the battle line to conserve and restore wild life. The latest innovation reported, is that of "tagging" deer, to try to learn more of their life history, ranging and feeding habits, to attempt to determine their real enemies, and to encourage reports reaching the American Game Protective Association, New York. Tagging of fish, ducks, upland game birds, and even song birds, has been in operation for some years and much valuable data compiled which is being made use of to help create ideal conditions for the various species. For instance, the life history of different kinds of ducks is being learned rapidly; their flight lanes established, their food, foods determined, and other conditions learned for their welfare ascertained. As a consequence, ideal refuges and sanctuaries are being established along the right lines.

Now comes the deer, to be put under the microscope of exacting science. The conservation department of Michigan is tagging a number of wild fawns, as rapidly as they can be caught. The location of deer tagging is carefully noted. When a tagged deer is taken later, comparisons with the original data will be made.

"Why?" science immediately asks, and then proceeds to find the answer. And within this answer will lie valuable life history of the wild deer that can be made use of in creating better conditions in the wild for this species.

The study will continue over a course of years, and, it is expected, practically every state that has deer will make similar studies of their native species.

Hoboes Flag Train

Foreigners Out Of Luck When Conductor Collects Fares

In those days of unemployment, it is nothing to see half dozen jobless men jump a freight on the fly in order to make the next town, possibly a job, but the climax was reached on the Hudson Bay Railway a few days ago when two foreigners got the idea that the "people's road" was made solely for their benefit.

The mixed train was running south from Churchill when it was flagged by two men at a small station. When the train stopped the men jumped in between the cars and began the ride to the Pas. The conductor, a young new Canadian, got a lesson in Canadian procedure. He walked down the train, ordered the men out from between the cars, and sent them back to the day coach. When they were seated, he collected their fares and the train proceeded.

Sweets For Livestock

Molasses In Grain Mixtures Found To Be Unprofitable

Feeding experiments at the University of Minnesota's College of Agriculture, tend to show it doesn't pay to cater to a calf's sweet tooth.

Using molasses in grain mixtures fed to calves, it was found they appeared to relish the food, but it brought no greater gains in weight than regular diets — without the expense of sweetener.

Urban and suburban railways of Berlin carried 445,000,000 passengers last year.

Linoleum wears better if waxed occasionally.

Mapping the Seas

Work Proceeds In Matter Of Correct Charting Of The Oceans Of the World

A new director is being elected to the International Hydrographic Bureau, at Monaco. This institute was founded after the war to enable the sea nations to share the results of their work on similar lines. It is in fact responsible for the correct charting of the oceans of the world. Now that experts, aided by accurate scientific instruments are able to map the seas with certainty, we must not forget the pioneer navigators of old who braved countless dangers on their voyages across unknown oceans.

Christopher Columbus was the most famous of these brave adventurers. His discoveries and achievements are well known. Ferdinand Magellan, the Portuguese navigator, who first sailed into the Pacific Ocean through the straits that bear his name, is not so well known, although his achievements in daring exploration and sea-exploration are of the greatest importance.

Disgraced with his treatment at the Portuguese court, he took service with King Philip II of Spain on a voyage to Asia. Magellan and the crew of the Victoria became the first to circumnavigate the globe. Ferdinand Magellan, the Portuguese navigator, who first sailed into the Pacific Ocean through the straits that bear his name, is not so well known, although his achievements in daring exploration and sea-exploration are of the greatest importance.

Suppose the deer is taken three years later, several hundred miles away from where it was originally tagged.

"Why?" science immediately asks, and then proceeds to find the answer.

And within this answer will lie valuable life history of the wild deer that can be made use of in creating better conditions in the wild for this species.

The study will continue over a

HER FAT IS MELTING FAST AWAY

All over the world Krunchen Salts is appealing to girls and women who strive for an attractive, free-from-fat figure that cannot fail to win admiration.

Here's the recipe that banishes fat and helps into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoonful of Krunchen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for it's the daily dose that takes off the pounds.

Krunchen daily means that every particle of poisonous waste matter and acid acids and gases are expelled from the body.

At the same time the stomach, liver, kidneys and bowels are toned up and the blood is cleansed.

Krunchen daily is followed by that Krunchen smile, that natural health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

CHAPTER XXVII.—Continued.

"Don't want anything but a cup o' tea, dearie, and maybe a slice o' toast. I remember Edward Howe saying that old folks don't need much come night. And—see here, child—the doctor told me about your plans and everything. I guess he thought he'd save you the trouble; and you're not to worry about me. I've always thought it would be kind of fun to live in a small house, and I'll be a sight easier for you to take care of me, too, not to go to the movies come night." Besides, Jim was able to see half block farther down the street from that window! And it's going to be wonderful to have you home all day. You needn't worry a mite about how I'll act, Charman. Between you and me, dearie, I think it's going to be easier!"

Only after the girl had turned away, undecided, and unable to speak at this display of bravery, did the old lips tremble.

"Thank God that's over," murmured Grandma brokenly, while big tears slowly down over her wrinkled cheeks.

CHAPTER XXVIII

There were times during the days that followed when Charman found it difficult to believe that she and Grandma were ever led into the shelter of the household. The old lady spoke cheerfully, stoically refusing admittance to the tears that lay so near the surface. Only when she was alone did her face show any of the dismay that filled her tired old heart. These were hard days for Grandma Davis.

"Seems somehow as if she'd grown smaller—shrunken, you might say," commented Lizzie Baker to Salina Knowles. "Not easy to make grandmas like Grandma Davis; and she keeps' up before Charman because of her good for her. And I'm sorry for Charman, too. I ain't ever seen a young person that set such store on anything old as she does on that old house. I declare, Salina, there's times when I wish we wobbers' buyin' it would back out of his bargain."

But Miss Lizzie was not to get her wish. It was the last day of August when George K. hailed Charman as he passed the house which had a formidable "Private" on its door, but which was in reality no more than a shop in the air we breathe, because only on rare occasions did the president of the Wicketfield National close his door. He closed it now, however, and asked: "What you been up to this afternoon?"

Charman smiled as she responded: "Why all this privacy? I've been to

the library, as you might deduce from this armful of books. But I got more than the books, Uncle George. I got a job! Miss Garfield has asked me to go to work for her every afternoon. Isn't that wonderful? I can easily leave Grandma that long, or get Miss Lizzie to come in and sit with her; and it will bring in a little money. It was Gamm's idea. I'm going to stop at his office now and thank him."

"Well, that's fine!" George K. spoke cheerfully. "I'll do you good to get away each day, and see folks. What I called you in for, Charman, was to say that you can sign the dead at ten o'clock tomorrow. I just got word that your man will here then, and wants to see you. I told him to come to the bank—thought every bank in town had a branch to sell the set done, as you might say. I'm thankful now, child, that she deeded the place to you. It would be hard for her to sign the house away. There, Charman, I'm sorry if I cry, cry, cry on my shoulder; but I advise you to buck up. In the long run most things come out right in this old world. If I didn't believe that truth I shouldn't be as happy as I am, or as fat, either!"

"Or so helpful to the rest of us," added Charman. "It's all right, Uncle George. I did my crying long ago, and have since acquired such a stiff upper lip that it sometimes seems to me that I'm probably hating a great deal more. I don't complain. I'll be here at ten. Now I must run up and thank Gamm for his suggestion, and then skip home. Thanks for—everything."

"Haven't you forgotten something?" asked George K. as he reached the door.

Charman turned, her eyes aglow with sudden merriment. This was an old joke of childhood's days, when as a little lass she often slipped into the room marked "Private" in search of the wee pink checkermints which George K. used to tell her "grew in his pockets." If, in those days, she forgot to bestow upon him a grateful kiss, he reminded her thusly and was rewarded by a kiss from straight-lipped enthusiasm. She came back now, laughing as she kissed him. Then the door closed behind her, while George K., watching from a window, saw her cross the street and start up the narrow stairs that led to Gamm Garfield's office in the building opposite.

"My Bill must have been crazy when he let that girl slip through his fingers," he complained to the four walls. "However, all's well that ends well, and I hope . . ."

What he hoped was interrupted by a fellow banker from Eastboro, who, as was everybody's custom, walked in minus the formality of a knock.

Charman, finding Gamaliel busy with a client, delivered her thanks briefly and moved on up Main Street with lagging feet. No need to tell Grandma that the dray day was at hand, although Letty had mentioned it. She came back now, laughing as she kissed him. Then the door closed behind her, while George K., watching from a window, saw her cross the street and start up the narrow stairs that led to Gamm Garfield's office in the building opposite.

"With but hate that seemed to both Gamaliel and the young man rather well-matched, Charman went home, and was at the door when John Carter reached the steps. She did not guess that in the moment that followed, both those loyal hearts in the room beyond were to be wracked almost to the breaking point. She did not realize that the front door was reflected in the long mirror that hung beside it, nor would it have troubled her if she had known. All she saw or thought of was the light in John Carter's eyes, and then the sharp, stinging pain into his hands.

She read the message and looked up, her lovely face reflecting the happiness that shone from his; and the next moment he caught her in his arms and kissed her, rapturously, exultantly. . . .

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

Like my mother before she fell in love with a fruit ranch."

Charman laughed, spontaneously, and Grandma asked: "You know you're playing second fiddle these days?"

"Something mighty near it," grimed Jim. "Will you believe it, Grandma, my doting mother hardly noticed when I deserted I left her home to buck up. In the long run most things come out right in this old world. If I didn't believe that truth I shouldn't be as happy as I am, or as fat, either!"

"Or so helpful to the rest of us," added Charman. "It's all right, Uncle George. I did my crying long ago, and have since acquired such a stiff upper lip that it sometimes seems to me that I'm probably hating a great deal more. I don't complain. I'll be here at ten. (To Be Continued.)

Fall Skin Abrasions — Minard's Liniment.

Misfortunes may be turned into victories by an indomitable will.

Many a saint after death develops virtues he had not exhibited in life.

If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never be given in too large quantity when children are ailing. Whether it's the stomach, or the little bowels; constipation, or diarrhea; when the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for babies.

He pushed her gently into the rocking chair, and drew up a straight-backed old Chippendale for himself. In a sort of daze Charman heard her grandmother say anxiously: "Hadn't you better get her a drink of water?" and at that she laughed.

"The not faint," she protested, "merely struck dumb, as you might say, Jiminy, you look—well—"

"Different, doesn't he?" put in Grandpa, Charman noticing for the first time since this homely homecoming, saw that his sweet old face looked happier than it had for days. "He's got a sort of air about him," she was saying. "I saw it right off when he came in. He looks—stylish."

"Gosh!" breathed Jim. "You talk

Advertising England

No Country In the World That Offers Greater Attractions

Britain, as Kipling said, or Lord Roberts, doesn't advertise." Sir Ernest, Pare, late high commissioner for New Zealand, has been telling advertising men, in London, that "Englishmen are too reticent."

Why, he asks, should it be "bad form" to talk about themselves and their country, especially when, as he says it, no other can compare with it in point of "human interest."

"What country has such wealth of historical places, such cathedrals, such homes both great and small?" he wants to know. And as for England's countryside in springtime, he says, "there's nothing on earth to equal it."

Yet somehow England and its chief town, in spite of a lack of capacity for advertising, seem to be fairly well-known abroad. Consider London just recently.

It was packed with distinguished visitors. They ranged from the King of Spain, Prince Danrong, the Sultan, and Prince Danilo, of Montenegro, to the newspaper editors of the Empire, the latest tennis celebrity and the newest contestant for the Henley regatta.

Their coming from all parts of the earth. The secret of it, of course, is that nowhere can you find such a round of entertainment, enjoyment and amusement packed into a few short months as you find in Britain during the "season."

You can have everything from grand opera to yachting, from the Royal Academy to a military tattoo, from a court levee or drawing-room to a golf championship, from a regatta to a flower show. There is

"nothing else like it in the world," said Charman, interrupting in horrified reproach.

"What do you mean, child, asking such a question?"

"I was only going to say in love with California," explained the girl. "I'm going to the Royal Academy to a military tattoo, from a court levee or drawing-room to a golf championship, from a regatta to a flower show. There is

"nothing else like it in the world," said Charman, interrupting in horrified reproach.

Naturally, it costs a great deal to share in these delights. You can spend from \$50 to \$150 a day at a luxury hotel in London. And if you take a fashionable flat to be in the centre of things you can hand out \$500 a week to your landlord who will think he is obtaining only his just dues.

Should you be in the millionaire class, you can live even more expensively. You can take a furnished house in the West End. It will be the last word in style and comfort, ready to walk into. A thousand dollars a week is not considered at all extravagant for such a temporary shelter.

Active At Old Age

Budapest Cabman Is Still Pressing Occupation At the Age Of 80

When should a man retire from active life, and how should he do it? A Budapest cabman thought that about 80 was a good age at which to stop work, but determined to do it "with a flourish." He drove his cab all over the continent, and attracted a good deal of attention by calling it—not altogether correctly—the last horse cab in Europe. Then, on his return, he presented the cab to the Hungarian king. But he was allowed to retire. The municipal authorities were so impressed by his adventurous career that they presented him with a taxi-cab. And now, though he is over 80, he is touring Europe once more—this time in the taxi. Old men are certainly more enterprising than "graybeards." Eastern Europe seems to specialize in these adventurous oldsters.

Oriental Poppy

New Bloom Is Developed By Resident Of Duncan, B.C.

An Oriental poppy, developed by a seedling by E. W. Neel, of Duncan, B.C., has been given an award of merit by the Royal Horticultural Society, and assigned the name "Cowichan" after the district in which it originated. The large bloom grows from 10 to 14 inches across on stalks over 4 feet 6 inches. The color of the flower is dark red. The seedling appeared voluntarily in Mr. Neel's garden, and he developed it.

U.S. Cost Of Living

The United States Department of Labor, through the bureau of labor statistics, has issued a report on changes in the cost of living in the United States in recent years, which shows a decrease of 2.1 per cent between June, 1929, and June, 1930. The information is given in based on actual prices obtained from merchants and dealers in 32 representative cities.

Radio so far appears to be a failure in India. Atmospheric conditions and lack of interest of a large portion of the people are two reasons, but the principal one is said to be the tax on receiving sets.

And a more liberal dose of Castoria is always better for growing children than strong medicines meant only for adults use.

Now South Wales, Australia, has banned all curb gasoline pumps.

Minard's Liniment for Lumbago and Neuralgia.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mr. H. F. Stewart, Findlater, Sask., writes: "A few years ago we all very bad with attacks of dysentery. My husband got bottles of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Explore Arctic With Submarine

Sir Hubert Wilkins To Cross Polar Regions By Undersea Passage

Sir Hubert Wilkins, arriving in New York yesterday, announced that the liner "Bremen" announced that he had virtually completed plans for his undersea passage in the North Polar regions, which he will undertake next summer in an obsolete submarine, which will be placed at his disposal by the Navy Department.

Local Case in Supreme Court

Chris Assmussen of this village, sometime ago raised a Supreme Court action against Charles W. Donald, blacksmith of this village for cancellation of an agreement of sale for certain lands and chattels sold to Donald for a blacksmithing business under an agreement dated Dec. 14th, 1929, alleging that the payments were in arrears. At the same time he obtained and served upon Donald an injunction, restraining him from any way disposing of or dealing with certain tools, machinery and other chattels alleged to be sold. This injunction was got by Assmussen upon an affidavit made by him, that unless he got that injunction against Donald dealing with the chattels it would be impossible for him, Assmussen, to protect his interests.

In his statement of defence Donald says that by an agreement dated October 10th, 1928, he bought the same land and chattels from Annie McHardy, and that said agreement contained no acceleration clause under which upon any default the whole sum or purchase price can be declared due and the purchaser dispossessed; that Assmussen later bought McHardy's agreement; that on or about Dec. 1929, the parties had agreed that the monthly payments should be reduced and that at Assmussen's request he called at the office of one Mr. Tredaway to sign up for the new variation; that Assmussen's solicitor was in a hurry to catch the train for Calgary; that he was unaware that the new paper contained any acceleration clause; that he was never informed thereof and never agreed to such a clause.

After the injunction and statement of claim were served, Donald in his defence says, that Assmussen called to his assistance the local provincial police, one Mr. Jarman, and that Assmussen and the policeman called him at his premises to interfere and subjected him to interference and embarrassment, in carrying on his business, and thereby committed a trespass by all which Donald says he has suffered without loss, and damage. He says in his affidavits and statements, that on account of the said injunction and illegal interference and trespass of Assmussen and the policeman, his business has suffered seriously, and that a contract with a Machine Co. which would have been valuable to him has been withdrawn. Donald counter-claims for damages, and for rectification of the agreement.

Later Assmussen put on a motion to strike out the counter-claim and to enter judgment for the full amount due under the agreement of sale, and Donald got leave to serve a counter motion to set aside and discharge Assmussen's injunction, and for an injunction against Assmussen or any one acting in collusion with him from interfering in Donald's business.

At the hearing before the Honorable Mr. Justice Tweedie on 28th July, the Judge adopted the view that the defence could not be struck out and dismissed Assmussen's motion with costs against him.

The Judge held further that there was no foundation for Assmussen's injunction and cancelled and dissolved it with costs against Assmussen.

With regard to the injunction against Assmussen the Judge said that as his injunction had been cancelled, Assmussen had now no motive to interfere further and that an injunction against him was unnecessary, and he dismissed the case.

Local and General

Monday, September 1st, Labor Day, a Dominion Holiday.

Walter Major was a business visitor in Calgary on Tuesday.

Mrs. P. I. McNally was a visitor in Calgary on Wednesday.

BORN—To Mr. and Mrs. F. Stearns at Calgary on August 25, a son.

"Auntie" Adderley is moving shortly into the McFadyen house on Oiler Street.

Miss Eva Jarman has returned from Cluny, where she had been visiting friends.

Miss Alice Collicutt who has been visiting in High River, returned home on Tuesday.

Labor Day, September 1, the post office wicket will be closed all day except from 10 to 11 a. m.

Mrs. A. W. Gordon returned home on Sunday after spending a week visiting her brother and friends in the Olds district.

Mrs. F. Mossop spent a few days the first of the week visiting with her son and daughter at Okotoks.

Guy Gazeley and Mel English spent Sunday picking raspberries, about 40 miles west of town and returned home at night with 40 lbs.

The regular monthly meeting of the Village Council will be held in the Secretary's office on Tuesday evening, Sept. 2 at 8 o'clock.

Miss Phyllis Coutts who has been visiting at the home of Mr. and Mrs. Thos. Mair has left for her home in Brandon, Man.

Painting of the fire hall has been completed. The trimmings in a dark brown, are not so hot.

Miss Ida Porteous of Calgary, is visiting in town this week, a guest at the home of Miss Ida Calhoun.

Mr. and Mrs. Hays and son of Okotoks were visitors at the home of Mrs. Hay's parents, Mr. and Mrs. F. Mossop over the weekend.

We notice by the Alix Free Press that our former townsmen Robert Whitfield is secretary of the Alix Agricultural Society.

motion for that injunction with costs to plaintiff.

The Judge also held that the defendant Donald was to be at liberty to have assessed and to recover such damages as he should be found to have sustained by reason of the injunction order.

The case will come up for further procedure in the near future.

Counsel for Assmussen, Milligan & Milligan, Calgary. Counsel for Donald, Robert Urie of Crossfield.

Local and General

Ivor Lewis, Jack Massie and Fred Stevens attended a banquet given in honor of Premier Bennett at the Palliser Hotel, Calgary on Friday night.

Two popular modern dramas will be presented by the Martin Erwin Players at the Crossfield Chautauquon on October 29-30-31 and Nov. 1.

Mr. and Mrs. W. McRory arrived home on Monday from Winnipeg where they have been visiting their son Chester for the past two weeks.

Mr. and Mrs. R. McFarlane of Bassano, made the week-end in town the guests of Mr. and Mrs. M. Thomas. They left for home on Sunday night accompanied by Mrs. Thomas.

We noticed Guy Gazeley in a great hurry on Tuesday last in search of a good brand of cigars. Having received the news that he was a grandpa of a big, fat, boinc boy.

E. S. McRory, general manager of the United Grain Growers, accompanied by D. McKay, superintendent, were business visitors in town for a few hours on Monday.

Happy MacMillan and Glen Williams made a motor trip to Sylvan Lake, Gull Lake and Bently on Sunday. Happy claims to have had the best feed of his life at the home of Glen's parents at Bently.

The post office would appreciate names and lodgings of the new school teachers throughout the district. If the secretary would send in this information it would greatly assist the post office.
